Husch Blackwell Named a Top Construction Law Firm by *Construction Executive*

FIRM RANKS SECOND IN FIFTH ANNUAL TOP 50 CONSTRUCTION LAW FIRMS™ RANKINGS.

Construction Executive magazine has listed Husch Blackwell in its fifth annual Top 50 Construction Law Firms™. Overall, Husch Blackwell placed second in the rankings, which appear in the magazine's June 2023 issue.

"We are incredibly proud to have been recognized as a top-ranked construction law firm, which we attribute to the trust and confidence our clients have placed in us," said partner Josh Levy, co-leader of Husch Blackwell's Construction Academy. "Our team's dedication to providing unparalleled service and delivering results has always been our top priority, and we deeply appreciate the faith that our clients have entrusted in us to support them in attaining their objectives."

Husch Blackwell has appeared on the list every year since 2019 when it was initially ranked 27th.

"The construction and government contracts practices have experienced tremendous growth over the past five years, demonstrating the benefits to both clients and lawyers from our industry alignment," said partner Jon Giokas, leader of the firm's Real Estate, Development & Construction industry group. "We continue to recruit exceptional talent to further serve our clients' objectives."

For more than 20 years, *Construction Executive* has been the leading trade magazine covering the business of construction. In its June 2023 issue, CE

published a comprehensive ranking of The Top 50 Construction Law Firms™ featuring breakouts and analysis accompanied by an article in which leading attorneys discuss their construction clients' most pressing business concerns.

To determine the ranking, CE asked hundreds of U.S. law firms with construction practices to complete a survey. Data collected included: 1) 2022 revenues from the firm's construction practice; 2) number of attorneys in the firm's construction practice; 3) percentage of firm's total revenues derived from its construction practice; 4) number of states in which the firm is licensed to practice; 5) year in which the construction practice was established; and 6) the number of Architecture, Engineering and Construction clients served during fiscal year 2022. The ranking was determined by an algorithm that weighted these factors in descending order of importance.
