OVERVIEW

Kirsten brings a wealth of industry-specific knowledge to renewable energy clients engaged in corporate transactions and project development.

Kirsten advises clients in the renewable energy industry on a variety of general corporate matters and wind and solar project development challenges. She is skilled at managing due diligence reviews of wind and solar projects; negotiating and drafting lease, option, and easement agreements; reviewing and revising purchase and sale agreements and disclosure schedules; and coordinating title curative efforts, including reviewing surveys and drafting encroachment agreements.

Kirsten is deeply involved in the industry and conversant with the applicable state and federal regulatory regime that governs renewable energy. She enjoys getting the tough assignments and routinely researches and analyzes complex issues to determine the best approach to regulatory compliance, while keeping her clients' goals and objectives top of mind.
